# ICP-MS eFamiliarization Disc Notification

**NOTE**: If you have already installed Flash version 23 or above on your PC, you may encounter difficulty viewing any Shockwave (.swf) video locally. In such case follow the instructions below.

Recently Adobe changed the security settings for Adobe Flash Player to address some security vulnerabilities when viewing any Shockwave (.swf) video locally on a PC. This new patch disabled viewing of any .swf files on any local PC. This document provides a workaround by adding the videos to a trusted sites list. This will enable you to view.swf videos provided on the ICP-MS eFamiliarization Disc. Perform this procedure only after consulting with your IT department.

## Adding trusted sites

### For Google Chrome

1 Go to http://www.macromedia.com/support/documentation/en/flashplayer/help/settings_manager04.html

2 Click the **Global Security Settings** tab.

3 Select **Always allow**.

4 Select **Edit locations > Add location**.

5 In the 'Trust this location' field type: D:/ or the location on your PC where the ICP-MS eFamiliarization Disc was saved to.
Alternatively, click **Browse for folder** and then navigate to the location of the ICP-MS eFamiliarization Disc or folder location on your PC.

6 Click **Confirm**.

7 Close Chrome and then reopen the index.htm file in the Disc or folder.

### For Internet Explorer

1 Go to **Control Panel.**

2 Type 'Flash Player' in the 'Search Control Panel' field and then press **Enter** on your keyboard.

3 Click **Flash Player** from the displayed list.

4 Click **Advanced > Trusted Location Settings**.

5 Click **Add**.

Agilent Technologies

**6**   Click **Add Folder**.

**7**   Navigate to the ICP-MS eFamiliarization Disc or folder location.

**8**   Navigate to and then select the "contents" folder.

**9**   Click **OK**.

**10**   Click **Confirm**.

**11**   Click **Close**.

**12**   Close Internet Explorer and then reopen the index.htm file in the Disc or folder.

Below is a link to the Adobe website discussing the problem and their suggested workaround.

## Installing video playback software

In some cases, computers may not have Windows Media Player or Adobe Flash Player installed.

**To install these programs:**

- Go to www.microsoft.com and search for 'Media Player'. Select the operating system from drop down menu. Click the appropriate link to install the product.

- Go to www.adobe.com and search for 'Flash Player'. Select **Get Adobe Flash Player** and then follow the online instructions.

| NOTE | A message may appear when using Internet Explorer while viewing the ICP-MS eFamiliarization Disc indicating that the browser restricted this webpage from running scripts or ActiveX controls. Click **Allow blocked content** to continue viewing. |
